Clean Bug Summary

The reported issue indicates that users are experiencing a problem that blocks or disrupts an expected workflow.

Severity / Priority

High

High — authentication issue affecting user access.

Classification Confidence

Confidence score: 85%

Business Impact

Users may be blocked from accessing the product after resetting their password.

>

 Why this classification?

Likely Affected Areas

- Authentication service
- Password reset controller
- Login form component
- Session or token generation logic
- Frontend error handling

Reproduction Steps

1. Open the affected feature in the application.
2. Follow the user workflow described in the support ticket.
3. Perform the action that triggers the issue.
4. Observe the application response.
5. Compare the actual result with the expected behavior.

Debugging Checklist

- Confirm the issue can be reproduced.
- Check browser console errors.
- Inspect network requests and API responses.
- Review backend logs.
- Verify validation rules.
- Confirm database or state changes.
- Check whether errors are displayed to users.
- Add logging if the failure is silent.

STEPS + DEBUGGING

Summary

Suggested Tests

- ☒ Login succeeds after password reset.
- ☒ Login fails with the old password.
- ☒ Invalid reset token shows a clear error message.
- ☒ Expired reset token shows a clear error message.
- ☒ Empty password field displays validation feedback.

Acceptance Criteria

- The issue is reproducible before the fix.
- The issue is resolved after the fix.
- The user receives clear feedback.
- Related tests are added.
- No regression is introduced in nearby functionality.

SUGGESTED TEST

Meet IBM Bob

IBM BOB USAGE

- ► Test planning
- ► Workflow design
- ► Engineering reasoning
- ► Code review assistance
- ► Repository understanding
- ► Documentation improvement

IBM BOB HELPED TRANSFORM SUPPORT ISSUES INTO STRUCTURED ENGINEERING WORKFLOWS

BUSINESS VALUE

Ticket2Fix reduces friction between support and engineering

- ✓ Reduces back-and-forth between support and developers
- ✓ Encourages consistent testing and acceptance criteria
- ✓ Helps junior developers understand issues faster
- ✓ Speeds up engineering triage
- ✓ Improves bug report quality

TICKET2FIX REDUCES THE COMMUNICATION GAP
BEFORE CODING STARTS
